SMV Purchases

4. Recently, the SMV Purchasing Office ordered rotary and counterflush drill rigs, valued at a minimum of 20,000,000 schillings from the USA firm, Mannesmann Trauzl A.G., and 300,000 schillings worth of German-made electric motors for the Matzen oil field area from Eduard Trotzmüller, Vienna VI, Stumpergasse 7.
5. The SMV has also purchased an electric lighting unit, which is mounted on a five-ton trailer, from a former German military warehouse in Langenzersdorf, where several units of this type and 15 mobile wireless units (Funkwagen) are now stored. The SMV Purchasing Office allegedly paid 80,000 schillings for this purchase to a USSR account at the Soviet Military Bank. This unit will be overhauled at the G. Rumpel A.G. plant in Siebenhirten before being sent to Matzen.
6. During the week of 13 February 1950 the SMV Purchasing Office made cash payments for the following purchases:

Pipe Imported from the USSR

8. On 27 February 1950, 11 carloads containing 182,460 kilograms of pipe arrived in Vienna from the Soviet Union. Shortly after Georgyevsky, representative of USIA's Central Commercial Bureau, accepted this shipment from the railroad on behalf of the SMV Central Warehouse in Neusiedl, all of these freight cars were suddenly commandeered by about 30 Soviet soldiers. Soviet military authorities in Vienna have advised the SMV that this shipment cannot be removed from Vienna railroad yards until further notice. SMV officials are rather disturbed by this intervention on the part of the military because only a few days before this episode, DDSG representatives in Vienna advised them that the Soviets have stopped and are now holding ^{two} barges loaded with about 10,000 tons of pipe in Budapest.

Import Shipments and Other Deliveries to the SMV

9. The following items were delivered to the SMV Central Warehouse in Neusiedl between 19 and 27 February 1950:

- 2 cars of hydrochloric acid from Budapest.
- 7 carloads of Diesel fuel from the Voessendorf refinery.
- 2 carloads of pipe shipped by Metrans from Czechoslovakia.
- 2 carloads containing 46,210 kilograms of pipe ^{shipped} from the Soviet Union via Greece.
- 1 carload containing 16 pieces of 10 3/4 inch x 10.2 millimeter drill pipe, weighing a total of 13,750 kilograms and having a combined length of 192.38 meters, and 1 carload containing 15 pieces of the same type of pipe, weighing a total of 11,960 kilograms and having a combined length of 170.38 meters, from Germany.

Refining

10. The SMV has temporarily suspended production at the Nova-Schwechat refinery which is now being renovated and repaired by G. Rumpel A.G. and the SMV Building Department (Bau-und Montage Abteilung).
11. SMV Headquarters recently ordered the Voessendorf refinery to deliver 16 to 17 tank cars of Diesel fuel per week to the SMV Central Warehouse in Neusiedl. Judging from the size of this order it seems likely that the SMV may have stepped up production at the Voessendorf refinery in order to fulfill current commitments of the Nova-Schwechat plant.
12. Recently, SMV Headquarters ordered SMV railroad dispatchers to discontinue sending tank cars to Budapest to pick up sulfuric acid.

SMV Personnel

13. In addition to Mittelman's replacement, Kacerovsky, a rather genial new member of the SMV Purchasing Office, Kusan is still trying to recruit two new purchasing agents. (5)
